

SEMIH BARUTCU

semihbarutcu@u.northwestern.edu

sbarutcu.github.io

Ph.D. candidate at Northwestern University with a focus in algorithm development for inverse problems, deep learning, and computer vision. Seeking full-time opportunities in artificial intelligence, data science and image processing fields.

EDUCATION

Ph.D. Electrical Engineering and Computer Science
Northwestern University, Class of 2022, GPA=3.98/4.00
(Katsaggelos Image & Video Processing Lab)

B.Sc. Electrical Engineering, *summa cum laude*
Bogazici University Istanbul, Class of 2017, GPA=3.80/4.00
(Minor in Business Administration and Management)

M.Sc. Electrical Engineering and Computer Science
Northwestern University, Class of 2018, GPA=3.98/4.00

(Full Scholarship) Exchange in Electrical & Computer Eng.
University of Texas at Austin, Class of 2017, GPA=3.84/4.00

TECHNICAL SKILLS

Scripting Languages: Python, MATLAB, Java, C / C++, Bash, Verilog, SQL, LaTeX

Tools/Libraries: PyTorch, TensorFlow, Keras, Scikit-Learn, Pandas, Numpy/Scipy, Matplotlib

EXPERIENCE

Image Processing and Deep Learning Research Assistant

Sept 2017 – Present

Northwestern University – Katsaggelos' Image and Video Processing Laboratory

Evanston, IL

- Developing deep learning techniques for computational microscopic imaging methods, combining x-ray ptychography, computational tomography, and laminography.
- Building neural networks for detection of Covid-19 and Cardiac Amyloidosis from chest x-rays.
- Exploring machine learning solutions to problems in computer vision and biomedical imaging

PhD Software Engineering Intern

June – Sept 2021

Uber

San Francisco, CA

- Optimize near-real time streaming pipelines for business critical ML Features and metrics.
- Onboard micro-services to tracing platform, and implement error categorization together with exception types for improving debuggability.

Computational Science Intern / Senior Computational Science Intern

June – Sept 2020

Argonne National Laboratory – The Advanced Photon Source

& June – August 2018

Lemont, IL

- Creating GANs for elimination of missing wedge problem in inverse tomography and laminography.
- Developing and implementing an iterative algorithm on direct coupling of computational tomography and x-ray ptychography.

Mobile Application Developer - Valensas Mobile Technologies

March – Sept 2017

R&D Engineering Intern - Mercedes – Benz Turk

August – Sept 2016

Software Engineering Intern - Aselsan Defense Industry Inc

June – July 2016

Digital Design Engineering Intern - Meteksan Defense Industry Inc

June – July 2015
